

## High performance film

At Polimur, we have developed a new range of products to satisfy the highest requirements of our clients, under the trademark GreenPlease. These new products have the highest quality and offer the optimum performance whilst being environmentally friendly.

These films have excellent properties both physically (strength, welding, shrinkable or stretching, etc) and optically (brightness, transparency, etc).

GreenPlease films are 100% recyclable, which saves you energy and raw materials. They are produced according to the highest environmental and quality certifications: ISO 14001 and ISO 9001.

In addition, this new GreenPlease range will allow us to adapt the product and help you to find the best suitable film for your business, so you will get the highest performance in the plastic you need. To conclude, let us advise you in order to get the best packaging solution for your products saving money and increasing quality at the same time.

## Why GreenPlease is your best option?

- ◎ **The best Quality**
- ◎ **Increased Productivity**
- ◎ **Environmentally-friendly**
- ◎ **Cost Reduction**
- ◎ **More Resistant Film**
- ◎ **Printed and unprinted**

## High performance film

### ⊙ **High Performance Packing Film**

Plastic film for packaging, which you will get a higher performance, improving the quality of your package and saving film.

### ⊙ **High Performance Shrink Film**

With our new shrink film we have reduced the thickness, improving the brightness and transparency without losing strenght.

### ⊙ **High Performance Stretch Film**

Automatic ultra stretchable film for high performance stretch wrapping machines. This film will allow you to wrap your pallets using much less plastic, helping you to reduce costs.

### ⊙ **Coreless Stretch Film**

For manual or automatic wrapping. Save money by only buying the film without the core, reducing the amount of waste. This film is delivered with an applicator, so you can use it all, right to the last meter.

### ⊙ **Pre-Stretched Film**

For manual or automatic wrapping. Eliminates the need to use a high performance stretch wrapping machine. It comes already pre-stretched, so the savings are guaranteed.

### ⊙ **Food Preservation Film**

100% P.E. film with very low thickness and high resistance. You will save film whilst still having a product made with the best technology and raw materials. Suitable for use with all kinds of food, even those containing up to 100% fat. Non PVC product - G.S.R.: 39.01445-MU
